

How to create a dial up connection in XP

1) Select start connect to then show all connection

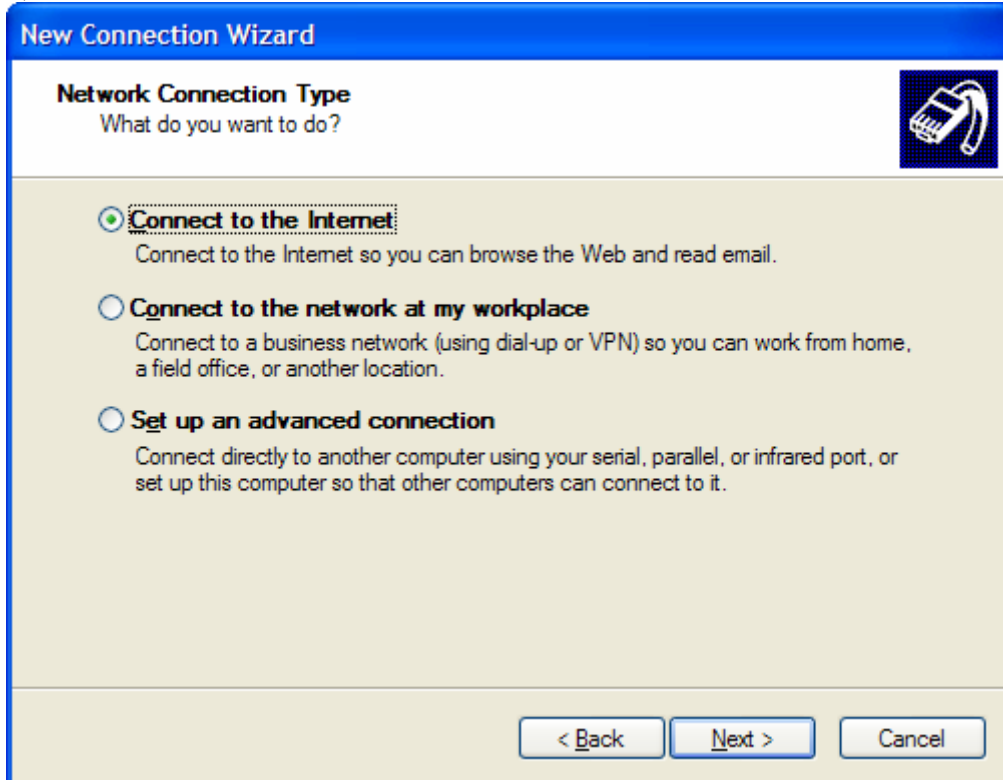

2) Click on Create new connection

3)Click next

4) Click on connect to the internet then click next

5) Click on set up my connection manually then click next

The image shows a Windows XP-style dialog box titled "New Connection Wizard". The title bar is blue with white text. The main area has a light beige background. At the top left, it says "Getting Ready" in bold, followed by "The wizard is preparing to set up your Internet connection." in a smaller font. To the right of this text is a small icon of a computer with a network cable. Below this, the question "How do you want to connect to the Internet?" is displayed. There are three radio button options: "Choose from a list of Internet service providers (ISPs)", "Set up my connection manually" (which is selected with a green dot), and "Use the CD I got from an ISP". Below the second option, there is a paragraph of text: "For a dial-up connection, you will need your account name, password, and a phone number for your ISP. For a broadband account, you won't need a phone number." At the bottom right, there are three buttons: "< Back", "Next >", and "Cancel".

New Connection Wizard

Getting Ready
The wizard is preparing to set up your Internet connection.

How do you want to connect to the Internet?

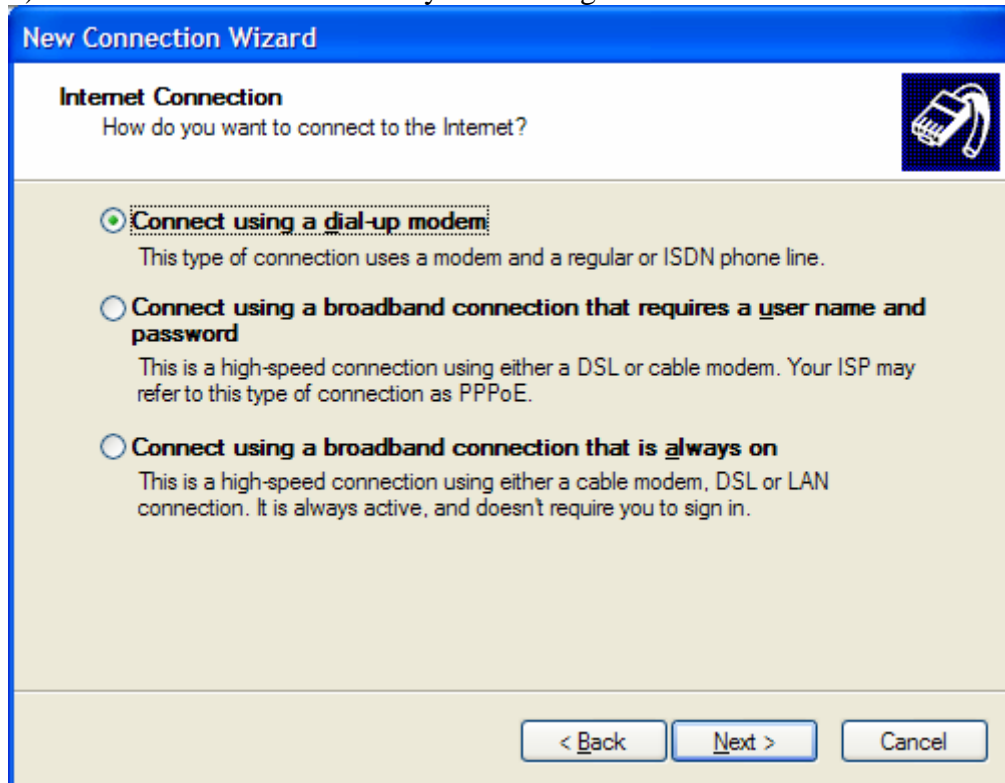

☐ Choose from a list of Internet service providers (ISPs)

☒ **Set up my connection manually**
For a dial-up connection, you will need your account name, password, and a phone number for your ISP. For a broadband account, you won't need a phone number.

☐ Use the CD I got from an ISP

< Back Next > Cancel

6) Click on whichever selection you are using then next

The image shows a Windows XP-style 'New Connection Wizard' dialog box. The title bar is blue with the text 'New Connection Wizard'. Below the title bar, the main area has a light beige background. At the top left of this area, it says 'Internet Connection' in bold, followed by the question 'How do you want to connect to the Internet?'. To the right of this text is a small icon of a modem. Below the question, there are three radio button options. The first option, 'Connect using a dial-up modem', is selected with a green dot. The second option is 'Connect using a broadband connection that requires a user name and password'. The third option is 'Connect using a broadband connection that is always on'. Each option has a descriptive paragraph below it. At the bottom right of the dialog box, there are three buttons: '< Back', 'Next >', and 'Cancel'.

New Connection Wizard

Internet Connection
How do you want to connect to the Internet?

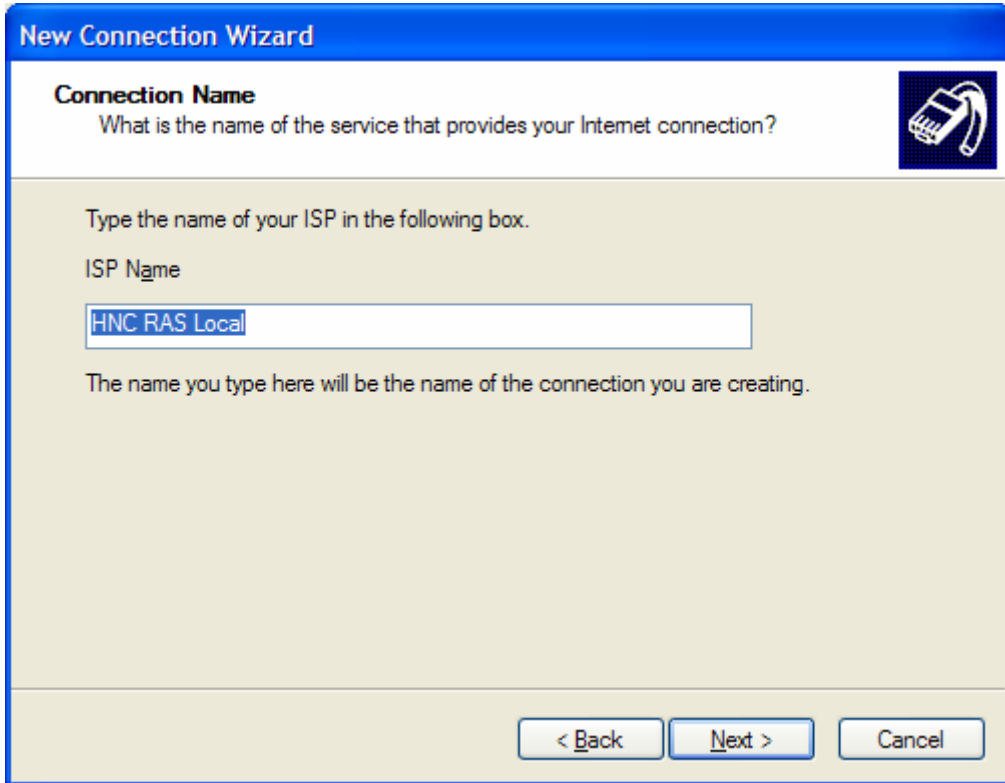

☒ **Connect using a dial-up modem**
This type of connection uses a modem and a regular or ISDN phone line.

☐ **Connect using a broadband connection that requires a user name and password**
This is a high-speed connection using either a DSL or cable modem. Your ISP may refer to this type of connection as PPPoE.

☐ **Connect using a broadband connection that is always on**
This is a high-speed connection using either a cable modem, DSL or LAN connection. It is always active, and doesn't require you to sign in.

7) Type in HNC Ras Local for local connection or HNC Ras 800 for long distance connection then next.

The image shows a Windows-style dialog box titled "New Connection Wizard". It has a blue title bar and a light beige main area. At the top, under the title bar, is the section "Connection Name" with the question "What is the name of the service that provides your Internet connection?". To the right of this text is a small icon of a modem. Below this, there is a prompt: "Type the name of your ISP in the following box." followed by the label "ISP Name". A text input field contains the text "HNC RAS Local". Below the input field, a note states: "The name you type here will be the name of the connection you are creating." At the bottom of the dialog, there are three buttons: "< Back", "Next >", and "Cancel".

New Connection Wizard

Connection Name
What is the name of the service that provides your Internet connection?

Type the name of your ISP in the following box.

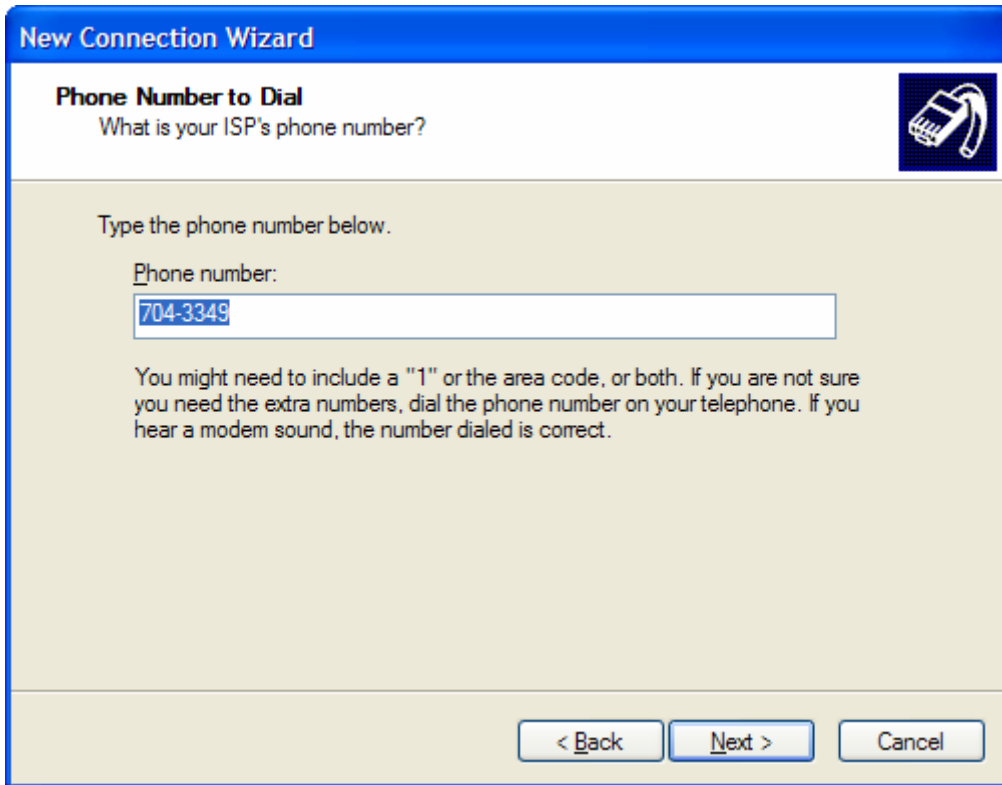

ISP Name

HNC RAS Local

The name you type here will be the name of the connection you are creating.

8)Type in 704-3349 for local number or if you are setting up for the 800 type in 1,800-447-1129 then next.

The image shows a Windows-style dialog box titled "New Connection Wizard". The title bar is blue with white text. The main area has a light beige background. At the top, there's a section titled "Phone Number to Dial" in bold, with the question "What is your ISP's phone number?" below it. To the right of this text is a small icon of a telephone handset. Below the question, it says "Type the phone number below." followed by a label "Phone number:" and a text input field containing "704-3349". Below the input field, there is a paragraph of instructional text: "You might need to include a '1' or the area code, or both. If you are not sure you need the extra numbers, dial the phone number on your telephone. If you hear a modem sound, the number dialed is correct." At the bottom of the dialog, there are three buttons: "< Back", "Next >", and "Cancel".

New Connection Wizard

Phone Number to Dial
What is your ISP's phone number?

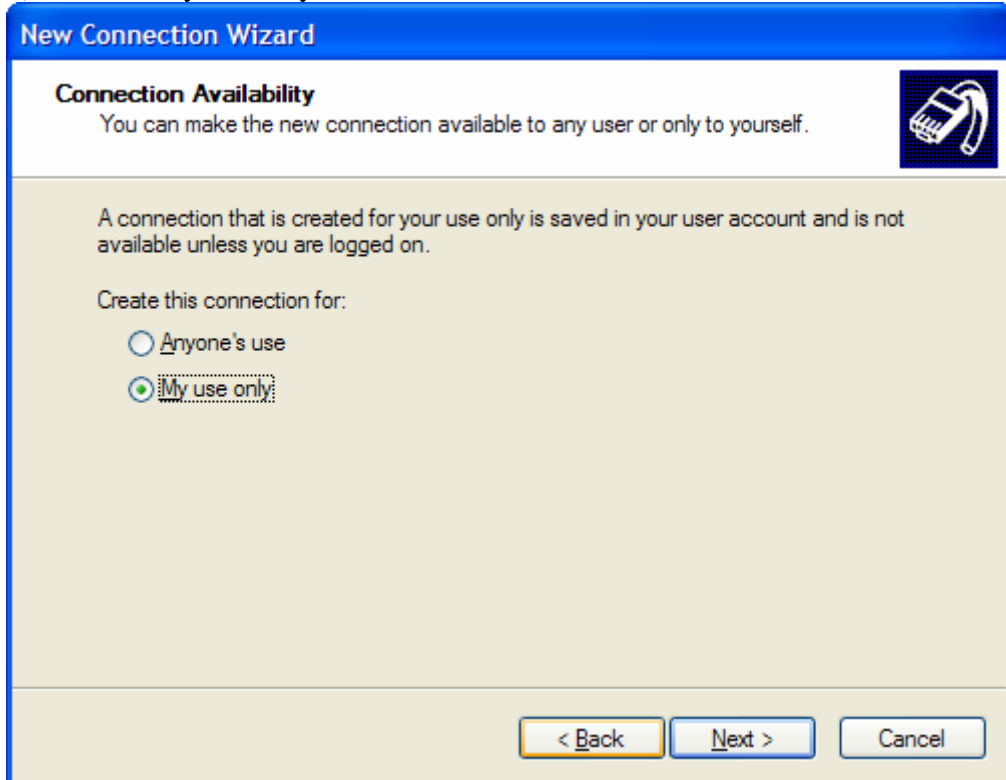

Type the phone number below.

Phone number:
704-3349

You might need to include a "1" or the area code, or both. If you are not sure you need the extra numbers, dial the phone number on your telephone. If you hear a modem sound, the number dialed is correct.

9) Click on my use only

The image shows a Windows XP-style dialog box titled "New Connection Wizard". The title bar is blue with white text. The main area has a light beige background. At the top, there's a section titled "Connection Availability" in bold black text, followed by the instruction "You can make the new connection available to any user or only to yourself." To the right of this text is a small icon of a network card. Below this, a paragraph explains: "A connection that is created for your use only is saved in your user account and is not available unless you are logged on." Then, it says "Create this connection for:" followed by two radio button options: "Anyone's use" and "My use only". The "My use only" option is selected, indicated by a green dot. At the bottom right, there are three buttons: "< Back" (highlighted with a yellow border), "Next >" (disabled, greyed out), and "Cancel".

New Connection Wizard

Connection Availability
You can make the new connection available to any user or only to yourself.

A connection that is created for your use only is saved in your user account and is not available unless you are logged on.

Create this connection for:

☐ Anyone's use

☒ My use only

< Back Next > Cancel

10) Type in user id and password then next.

New Connection Wizard

Internet Account Information
You will need an account name and password to sign in to your Internet account.

Type an ISP account name and password, then write down this information and store it in a safe place. (If you have forgotten an existing account name or password, contact your ISP.)

User name:

Password:

Confirm password:

☒ Make this the default Internet connection

< Back Next > Cancel

11) Select add a shortcut to this connection to my desktop and finish.
